

JULY HOUSE

CARPENTRY & DESIGN

Interior Design pricing

Our approach is to provide bespoke interior design advice and styling at an affordable price. We pride ourselves in creating relaxed, comfortable and welcoming interiors. We know that homes are made to be lived in and cannot be show homes every day, but with the right furnishings and fixtures we can create a sense of luxury amidst the chaos of busy life.

Home Design

This option is for those who are thinking of redecorating or renovating a particular room, but are perhaps overwhelmed with how many decisions there are to be made. From kitchens and bathrooms to bedrooms and living rooms, we can work with you to help you achieve wonderful spaces with well thought out design decisions.

After an initial consultation to discuss your plan and ideas, we will design your interior with your vision in mind. Once we've established a budget for your project we'll get to work, and (usually within a week or two) you'll receive a moodboard, floorplan, shopping list and samples (if required). We can recommend decorating styles and window dressings, soft furnishings and artwork. After this, you can order the suggested items and install yourself, or for an extra fee, we can come to your home and style the space.

We can also recommend tradespeople to complete any decorating/building work for you if required.

Home Styling

When you feel a space needs a new lease of life, some finishing touches or perhaps you're selling your property and would like to make your home even more desirable to potential buyers.

After an initial discussion, together we'll decide what's best for your space, and you'll be sent a full concept board including a suggested shopping list of items to refresh your room. As with the design service, you can then order the items at your own pace knowing that each new item will have been specially selected for you. We can then come to your home and help dress and finish the space.
